FOSTER MCLANE

CYBER SECURITY ANALYST

ABOUT

I am a computer enthusiast and enjoy almost everything to do with computers, from low-level logic circuits to high-level programming. I am especially interested in embedded programming, operation systems, program security, network security, and network protocols. In addition to my computer enthusiasm, I have a large interest in high school level education in computational thinking.

I WORK EXPERIENCE

Clemson University

https://ccit.clemson.edu/about/departments/security-operationscenter/

December 2017 - Present

Cyber Security Analyst

Under the Office of Information Security and Privacy, I am a full-time analyst of Clemson's computer network for identifying potential cyber security threats, mitigating current threats, and preventing current threats from happening in the future.

FoosterNET, LLC

https://fooster.io/

November 2013 - Present

Owner

FoosterNET, LLC is a company I use for freelance work in cyber security consulting, system administration, and computer programming. It additionally sanctions all other services I provide for money including server hosting.

Clemson University

https://ccit.clemson.edu/about/departments/security-operationscenter/

January 2017 – December 2017

Cyber Security Intern

Under the Office of Information Security and Privacy, I was a part-time analyst of Clemson's computer network for identifying potential cyber security threats, mitigating current threats, and preventing current threats from happening in the future.

<u>m</u> EDUCATION

Clemson University

January 2017 - May 2017

Virtual Reality Intern

Under Dr. Stephen Moysey, I worked to bring virtual reality to the university in a variety of ways including setting up VR systems, coordinating generally available VR equipment for students and faculty, and creating demos for VR.

Clemson University

January 2016 - December 2016

Virtual Reality Game Development Intern

Under Dr. Stephen Moysey, I researched teaching applications of geological sciences field techniques in a virtual reality video game. The game, titled Virtual Reality Field Experiences, features a trip to the Grand Canyon where the gamer learns rock identification techniques and builds the stratigraphic column of the canyon.

Clemson University

http://people.clemson.edu/~yue6/ January 2015 – May 2016

Undergraduate Student Researcher in UAV and Manufacuring Robotics

Under Dr. Yue Wang, I researched quadrotor control algorithms and trust aware manufacturing in the Interdisciplinary Intelligence Research Lab, or I²R Lab.

***** AWARDS

April 2014

SC Junior Academy of Science

Toutstanding Research and Presentation

Awards: 1st Oral Presentation - Computer Science, 1st Written Presentation - Computer Science. The awards included an invitation to the American Junior Academy of Science.

2014 2018

Clemson University

Bachelor of Science

Computer Science, with an interest in Education, Math, and Langauge

Courses

- Algorithms
- Software Engineering
- Operating Systems
- Network Programming
- Principles of Programming Languages
- Computer Security Principles
- Special Topics in Embedded Computing
- Foundations of Computer Science
- Distributed and Cluster Computing
- 2D Game Engine Construction
- ◀ Virtual Reality Systems

2012 2014

SC Governor's School for Science and Mathematics

High School

Computer Science

Courses

- Advanced Computer
 Science
- ◆ Digital Logic
- Modern Physics

VOLUNTEER

FTC - Star Bots 6170

http://ehs.pickens.k12.sc.us/fine_arts_organizations/student_life/robotics_club

SKILLS

Mentor

After having three years of experience of participating in the FIRST Tech Challenge robotics competition, or FTC, including one year of which I was team captain and made it to the super regional competition, I mentor the nearby Easley team, Starbots.

SC Robotics Education Foundation

http://scref.org/ January 2015 – Present

Field Technical Advisor and Field Inspector

After three years of experience of participating in the FIRST Tech Challenge robotics competition, I volunteer to run the scrimmage hosted by the SC GSSM and am the main technical coordinator for the state competition.

Gentoo Overlay - fkmclane

Attps://github.com/fkmclane/overlay May 2013 - Present

Owner

I have a recognized overlay for my distribution of choice for my workstation, Gentoo. I maintain over 150 packages in this overlay that range from little X11 tools to the Unity Editor, from the game engine, for Linux to all of the Linux software associated with Plex. Additionally I have a few of my own tools that I wrote such as one to manage tty sessions intelligently without having a display manager.

CU Cyber

https://cucyber.net/ August 2015 - April 2018

Level 5 Tech Support

CU Cyber is the cyber security club at Clemson University. We participate in cyber defense competitions and hold weekly seminars involving cyber security. I was the secretary and then Level 5 Tech Support of CU Cyber where I maintained club organization, club preparation, and various technological aspects. I additionally helped create many of the weekly seminars given.

CU Rocket Engineering

January 2017 - August 2018

Lead Avionics

As lead avionics, I coordinated the team that created the electronic internals of the rockets we flew at the Intercollegiate Rocket Engineering Competition. I did a lot of the design work

Programming Master

> C# **Python PHP** Java

JavaScript

Unix Administration Master

Website Deployment

Virtual Machines Networking

General Services

RedHat Enterprise Linux Ubuntu

Arch Linux Gentoo Linux

Debian **FreeBSD**

Network Security Proficient

> Cisco **Palo Alto** pfSense

Endian UniFi

Virtualization **Proficient**

PUBLICATIONS

and kept the team productive.

Clemson ACM

Attps://www.cs.clemson.edu/acm/ September 2014 – January 2017

Webmaster

ACM, the Association for Computing Machinery, is the world's largest society for scientific and educational computing. I was the webmaster of Clemson University's local chapter where I created and maintained their website.

Trust-Based Mixed-Initiative Teleoperation of Mobile Robots

■ American Control Conference 06 July 2016

http://ieeexplore.ieee.org/abstract/document/

Trust-Based Mixed-Initiative Teleoperation of Mobile Robots is a scheme for the bilateral teleoperation of mobile robotic systems using a quadrotor, ground robot, and a haptic feedback device. In the scheme, control is shared between human and autonomous controllers with the human controller having force feedback cues. Two-way trust models are calculated to dynamically scale each control input for optimal performance and reduced physical workload of the human operator. The results indicate that the proposed scheme improves task performance by 31% and reduces the operator workload by 23.9%.

Vision-Based Control of a Quadrotor

■ SC GSSM

01 February 2014

Vision-Based Control of a Quadrotor uses a quadrotor and its two mounted cameras to have the quadrotor perform basic analysis of its environment and make decisions based on it. It includes basic applications for following a marked path or object and an extensible interface for writing more complex autonomous logic.
